Small investors with money!

**Denver Airbnb market – how
best can they invest?**

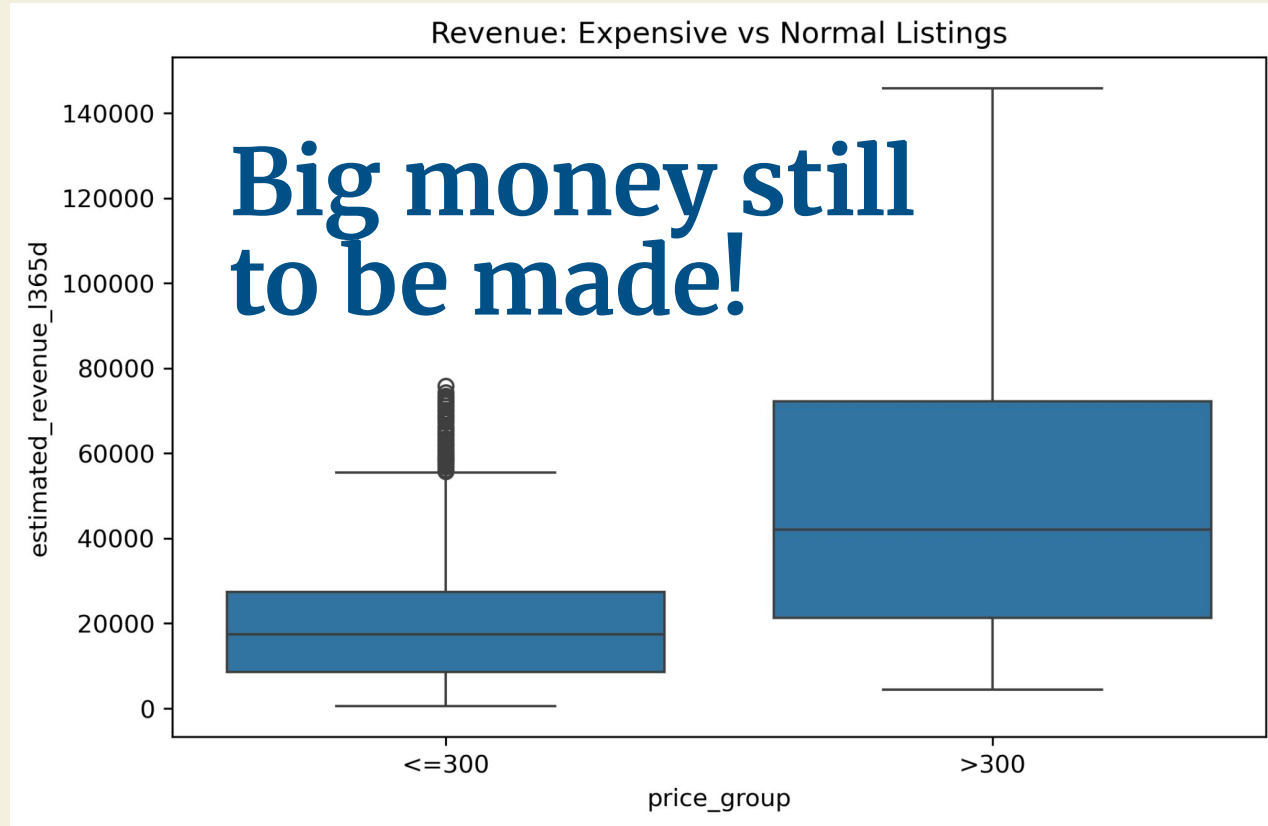

Removed outliers – lets narrow the scope of investment

Airbnb prices with red removed outliers

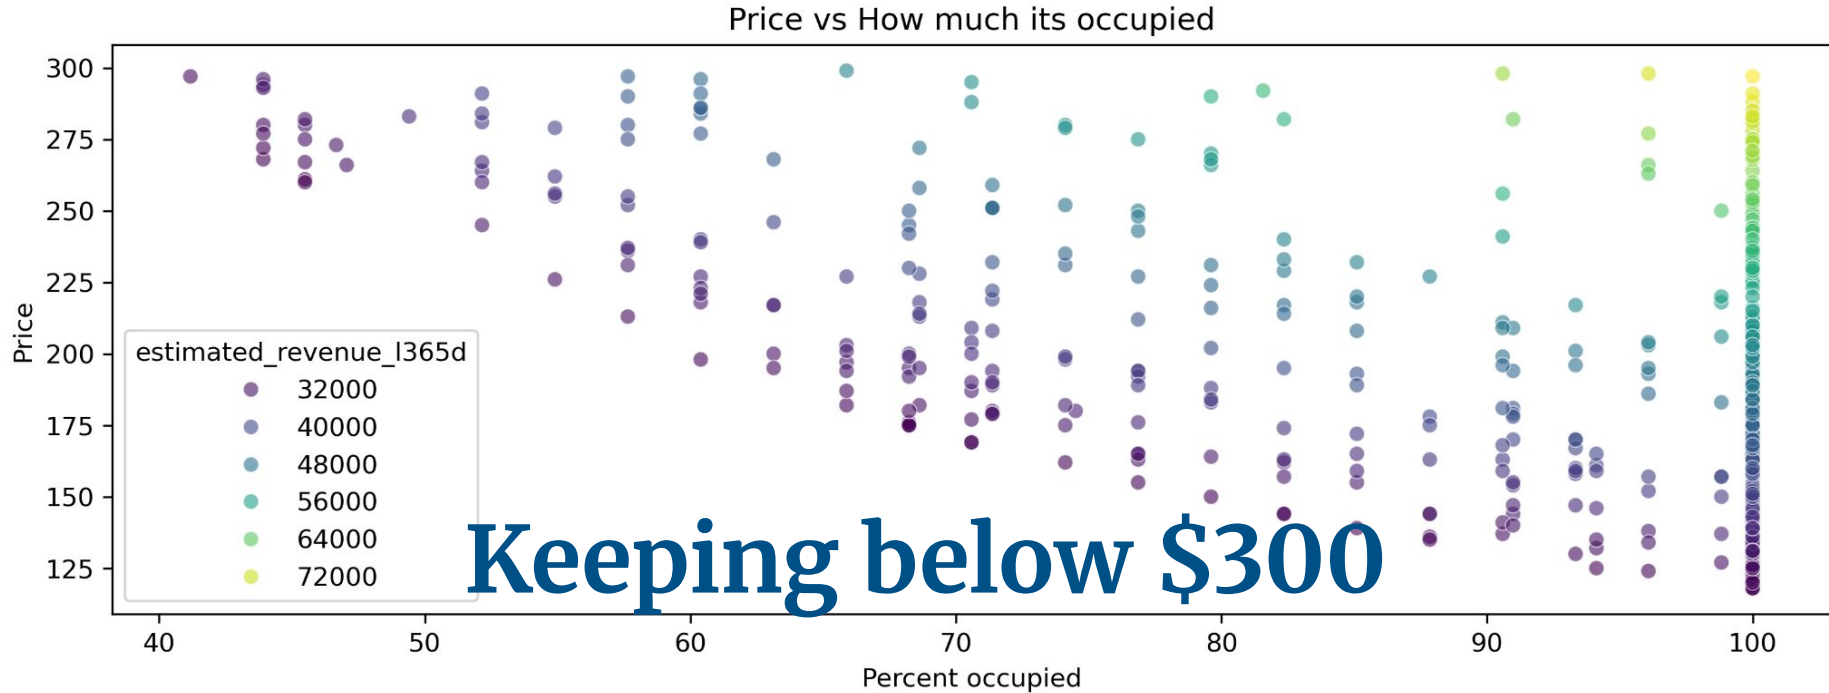

Narrowed the scope to a family friendly cost of \$300 or under a night

What if we could capture the top 75%?

Price is a driving factor to making \$\$, what else?

Occupation! Gotta keep people in the rental!

Found a sweet spot of investment

What next?

What does the housing market look like in Denver?

Are there seasonal trends? Better places near public transportation or tourist locations?

Use models to predict rather than just show correlations?
